

Theme/Title Bachelor Thesis AGREEMENT

Student's first name and last name: Doreata Andrei Stefan

Specialization: Computer Science English

Class academic years: 2019 - 2022

First name and last name of the scientific advisor: Tudor-Dan Mihoc

Thesis domain: Full stack Development

Thesis title: IDeal – Modern Idea Incubator

Bachelor thesis topic description:

My project pictures the development of a Web Application designed for helping the entrepreneurs who are at the start of the road by letting the existing organizations: structure, affirm, fund, and enhance their ideas, thus creating a safe environment for the learning and growth of the individual guided in professional manners..

In contrast, the application will offer rich customizability and a smooth modern experience such that users will be able to affirm themselves, and organizations will quickly use the solution productively and best suited for their working pace.

The key feature of the solution offered is not only its functionalities or customizability but also its speed in searching, creating, and augmenting ideas because of its modern and robust architecture.
